

WONDER BUNCH

MEDIA

Wonder Bunch Media creates high-quality learning apps inspired by the wonder of nature that leave children feeling happy, smarter, more confident – and calm. It is our ultimate goal to get every child who plays our apps to set down their device and go outside.

OUR STORY

Wonder Bunch Media was founded in 2019 by Meghan and Alex Michelic, parents of four young daughters. Meghan and Alex noticed how many children’s apps are loaded with bright colors, flashing lights, and obnoxious sounds, and are not based on appropriate cognitive building blocks. After talking with early childhood educators and other parents, they decided to develop their own series of apps to address the concerns of parents and make learning fun and engaging for children. The first Wonder Bunch app, Letter Meadow, was released in March 2020.

OUR APPROACH

The Wonder Bunch characters are based on real kids that children will be able to relate to.

Our games are age appropriate and meet children where they are so they don’t get stuck and become frustrated.

Appreciating the wonder of nature is a core part of every game. The Wonder Bunch kids take your kids on adventures to different locations where they can explore and interact with nature. We hope this also inspires them to want to explore and care for our earth.

WHAT WE BEE-LIEVE

Every child’s first touch with technology can be one of active learning and not passive spectating.

Children deserve high-quality illustrations and music in the apps they play, respecting each child’s ability to learn and grow in their own way.

There is incredible importance in teaching our children about respecting and sustaining our Earth.
